

# INNIO's IMS Policy

INNIO draws from its innovative capacity, inspiration and technological expertise to develop clean power generation and supply concepts. These are important tasks which need to be done if future generations are to enjoy a world worth living in.

To achieve them, INNIO has implemented a corporate policy governing the development of an Integrated Management System (IMS policy) in compliance with all international standards for Environmental management (ISO 14001), Quality management (ISO 9001), occupational Health & Safety management (ISO 45001) and Energy management (ISO 50001). The IMS policy is valid at the Jenbach, Austria site only.

## Key aspects of INNIO's IMS Policy

- Responsibility towards customers, society, immediate neighbors, employees and shareholders
- Protecting the lives and health of our employees and all other stakeholders
- Regular analysis of the expectations and requirements of all stakeholder groups, integration of relevant insights into our corporate processes
- Learning from incidents and deviations, defining corrective measures
- Use of high-quality materials to produce reliable, long-lasting, quality products
- Reduction of all emissions, sparing utilization of resources, development of products that sustainably meet these requirements
