

P3V3i spark plug delivers enhanced Jenbacher Type 2, 3, & 4 gas engine operation

OEM Spare Parts Offering

Product description

As the industry continuously strives to lower emissions and boost efficiency, INNIO's research and development teams address these challenges with innovative lean-burn combustion gas engine technology combined with high internal combustion pressures.

Our gas engine experts have developed new high performance P3V3i spark plugs that generate stable ignition energy for our Jenbacher* Type 2, 3, and 4 gas engines. These spark plugs – manufactured in Styria, Austria – support greater efficiency, lower emissions, and reduced life cycle costs.

Product details

With the same lifetime as the proven P3V3N1 spark plug, the P3V3i builds on its predecessor's strengths with a new center earth electrode and improved shield design for a significantly simplified and more robust re-gapping process that helps cut maintenance time and significantly reduces harm to the electrodes. The P3V3i spark plug's re-gapping tool also can be used for other spark plug types for Jenbacher Type 2, 3 and 4 gas engines.

Because our P3V3i spark plugs are developed in compliance with technical regulations for compatibility with your Jenbacher gas engines, they help support engine emission and efficiency specifications as well as maintaining engine-related warranties and guarantees.

Additionally, you benefit from professional and fast technical after-sales support from Jenbacher team.

Customer benefits

- Greater efficiency**
 Precisely optimized electrode positioning delivers better gas flow, reduced gas consumption, and efficiency gains over the spark plug's lifetime.
- Enhanced robustness**
 The new spark plug's center electrode delivers a more robust re-gapping process.
- Better ignition performance**
 The spark plug's accurate adjustment capability allows it to operate in an optimized ignition range.
- Faster, more accurate, and safer maintenance**
 The newly developed re-gapping tool cuts maintenance time and significantly reduces any harm to the electrodes.

Applicable units

The P3V3i spark plug is applicable to all Jenbacher Type 2, 3 and 4 gas engine versions running on natural gas, biogas, landfill gas, sewage gas, or coal mine gas.

INNIO* is a leading solutions provider of gas engines, power equipment, a digital platform and related services for power generation and gas compression at or near the point of use. With our Jenbacher* and Waukesha* product brands, INNIO pushes beyond the possible and looks boldly toward tomorrow. Our diverse portfolio of reliable, economical and sustainable industrial gas engines generates 200 kW to 10 MW of power for numerous industries globally. We can provide life cycle support to the more than 48,000 delivered gas engines worldwide. And, backed by our service network in more than 100 countries, INNIO connects with you locally for rapid response to your service needs. Headquartered in Jenbach, Austria, the business also has primary operations in Welland, Ontario, Canada, and Waukesha, Wisconsin, US.
