PRESS RELEASE

INNIO Expands Waukesha Site to Meet Growing Demand for Decentralized Energy Solutions in the U.S.

WAUKESHA, Wisconsin, U.S.–August 19, 2026 – INNIO N.V. (Nasdaq: INIO) plans to invest more than $300 million in its Waukesha, Wisconsin, facility and to create more than 500 jobs over the coming years.

“The expansion underscores our commitment to local value creation in the United States and to meeting the growing demand for decentralized energy solutions that are helping shape the future of energy,” said Roger George, CEO Waukesha, INNIO.

To support increasing customer demand in the U.S., the company plans to add new engine assembly capabilities at the site. Planned investments also include the construction of an advanced engine testing facility exceeding 80,000 square feet, along with office and shop floor renovations to strengthen operational efficiency.

Engines produced in Waukesha power critical infrastructure across the United States, including data centers, power grids, and industrial operations. The expansion brings production closer to customers, strengthening INNIO’s ability to serve the rapidly growing data center sector. INNIO’s energy solutions help address grid constraints and support a reliable and resilient power supply. INNIO currently conducts remanufacturing, repair, and overhaul operations at its Waukesha campus, which spans approximately 1.7 million square feet and includes nearly 890,000 square feet of manufacturing and operational space.

To support the planned expansion in Waukesha, INNIO is creating new employment opportunities across a range of functions, including assembly and production, engineering, machining and CNC operations, material handling and warehouse operations, as well as electrical and maintenance technician roles. Interested candidates are encouraged to explore current openings and apply here. [Link: INNIO Careers].

Alongside INNIO’s U.S. facilities in Trenton, New Jersey, and Waller, Texas, the Waukesha campus serves as a key regional hub. The expanded site will support local production and testing capabilities, helping to reduce lead times while increasing capacity, operational flexibility, and responsiveness to customer needs.

Forward-Looking Statements

This press release includes forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this press release, including statements regarding our future results of operations and financial position, industry dynamics, business strategy, order expectations and plans, and our objectives for future operations are forward-looking statements. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "aim," "expect," "plan," "anticipate," "could," "intend," "target," "project," "contemplate," "believe," "estimate," "predict," "potential" or "continue" or the negative of these words or other similar terms or expressions that are intended to identify forward-looking statements.

These forward-looking statements involve known and unknown risks, uncertainties, changes in circumstances that are difficult to predict and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statement. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this press release may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. We caution you therefore against relying on these forward-looking statements, and we qualify all of our forward-looking statements by these cautionary statements. For additional information on other potential risks and uncertainties that could cause actual results to differ from expected results, please refer to those set forth under "Risk Factors" in our Registration Statement on Form S-1/A, filed with the Securities and Exchange Commission on May 26, 2026.

The forward-looking statements included in this press release are made only as of the date hereof. We undertake no obligation to update any forward-looking statements for any reason after the date of this press release to conform these statements to actual results or to changes in our expectations, except as may be required by law.

About INNIO N.V.

INNIO N.V. (Nasdaq: INIO) is a global distributed energy solutions provider that delivers reliable, flexible, transient, decentralized, modular, and efficient power. With a track record of innovation, INNIO designs, manufactures, and services high-performance power systems under its Jenbacher and Waukesha brands. INNIO delivers power for applications including data centers, microgrids, grid stabilization, industrial energy, and gas compression.

INNIO has global coverage across approximately 100 countries as of December 31, 2025, supported by a resilient, high-margin services business that delivers long-term, recurring revenues across the full equipment lifecycle. As electricity demand accelerates—driven by AI, electrification and grid constraints—INNIO enables scalable, behind-the-meter power generation with high efficiency, fast-start capability, strong transient performance, and fuel flexibility, including hydrogen-ready solutions. Headquartered in Munich, Germany, INNIO employs over 5,000 people worldwide as of December 31, 2025, and is committed to *moving energy forward*.
